## The Opportunity

Full Time, Permanent (Hybrid) at Calgary Office

## Position Description

We are seeking a highly motivated and experienced Cyber Security Analyst with SOC experience to join our team. The ideal candidate will have a strong understanding of the latest security threats and mitigation techniques, as well as experience in a Security Operations Center (SOC) environment.

## Position Responsibilities and Accountabilities

- Monitor and analyze network traffic for potential security threats.
- Investigate security incidents and provide recommendations for remediation.
- Develop and implement security policies and procedures to prevent security incidents.
- Conduct vulnerability assessments and penetration testing.
- Monitor and maintain security systems, including firewalls, intrusion detection systems, and other security-related technologies.
- Work collaboratively with other teams to identify and mitigate security risks.
- Stay up-to-date with the latest security threats and trends.
- Participate in security audits and assessments as needed.
- Provide regular reports to management on security incidents and activities.

## Key Attributes and Skills

- Bachelor's degree in Computer Science, Information Security, or a related field
- Minimum of 3 years of experience in Cyber Security, with a focus on SOC operations
- Strong understanding of security technologies and concepts, including firewalls, intrusion detection/prevention systems, SIEM, and endpoint security
- Knowledge of security frameworks such as NIST and CIS Controls
- Experience with vulnerability management and penetration testing tools
- Excellent communication and collaboration skills
- Relevant certifications such as CISSP, CompTIA Security+, and CEH are highly desirable
